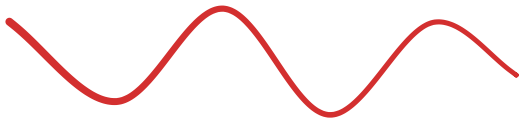
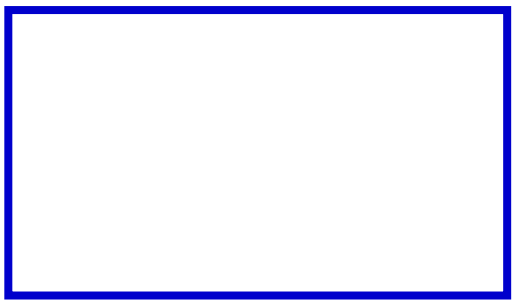
Pen test - page 1

This page checks that the reader hides Defter's own notes and keeps the others.
Normally you see only the blue box on the right (a note from another program).
With ?defterNot=goster in the address you also see a red pen line and a yellow highlighter stroke over this line of text - those are Defter's own Ink notes.

Defter pen line (hidden):

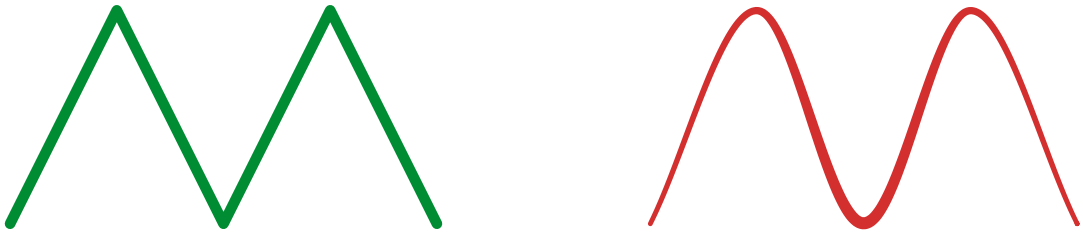


Note from another program (always visible):



Pen test - page 2

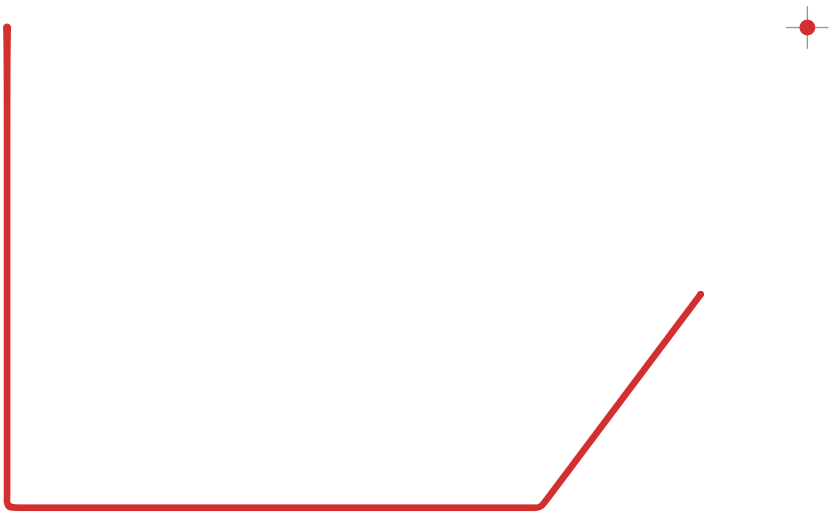
Two Ink notes. The green one on the left comes from another program (author "GoodNotes") and is always visible. The red one on the right is Defter's (author 'Defter'):
hidden normally, visible with ?defterNot=goster.



Pen test - page 3: rotated 90

The grey lines are part of the page. Defter's red pen line, yellow highlighter and red dot must lie exactly on them. With ?cizimKontrol=1 a cyan dashed line shows the reader's layer over pdf.js's own drawing of the notes.

Highlighted line: the quick brown fox



Pen test - page 4: rotated 180

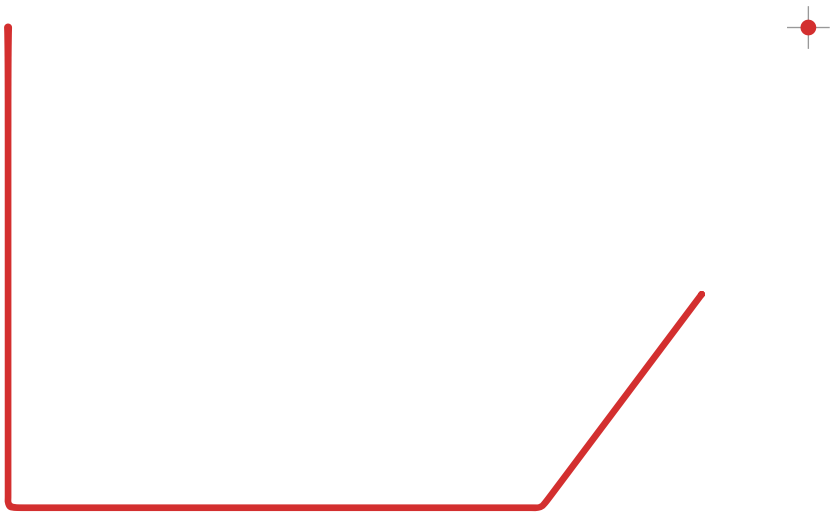
The grey lines are part of the page. Defter's red pen line, yellow highlighter and red dot must lie exactly on them. With ?cizimKontrol=1 a cyan dashed line shows the reader's layer over pdf.js's own drawing of the notes.

Highlighted line: the quick brown fox

Pen test - page 5: rotated 270

The grey lines are part of the page. Defter's red pen line, yellow highlighter and red dot must lie exactly on them. With ?cizimKontrol=1 a cyan dashed line shows the reader's layer over pdf.js's own drawing of the notes.

Highlighted line: the quick brown fox



Pen test - page 6: CropBox from 120 160

The grey lines are part of the page. Defter's red pen line, yellow highlighter and red dot must lie exactly on them. With ?cizimKontrol=1 a cyan dashed line shows the reader's layer over pdf.js's own drawing of the notes.

Highlighted line: the quick brown fox
